Microsoft 365 cloud environment security training for IT administrators

Microsoft 365 cloud environment security training for IT administrators €2000

Our cloud architect will go through in an 2h-3h workshop topics that interest you and would also provide suggestions and best practises. We can personalise this based on your company's needs:

- Assessment of the current status based on Microsoft 365 tenant and licenses and recommendations based on this
- Microsoft 365 environment auditing and Endpoint Manager overview
- Device Management – Windows 11 and Mac-s and everything that goes with it – MFA and Conditional policies
- Mobile device Management – app protection policies (MAM) and device management policies (MDM).
    - When to use and when to use them together
- Conditional Access policies aka making users, devices and data accessing more secure and more regulated
- Logs and monitoring for cloud services
- Data protection with Microsoft Compliancy solutions (Sensitivity labelling, retention policies, Data Loss Prevention)
- Guest accounts accesses and data sharing with outside of the organisation partners
- And any other questions
